BoingfireEDU-CA Program

Integrated Technology Solutions for **Canadian** 🍁 Educational Institutions.

Boingfire is a proudly Canadian company dedicated to developing innovative technology solutions right here in Canada. Through our BoingfireEDU-CA program, we're committed to supporting Canadian educational institutions with specialized partnerships and exclusive educational discounts.

Why Choose BoingfireEDU-CA?

1. Exceptional Value & ROI

Enjoy up to 20%+ educational discount on all systems, combining low initial costs with maximum return on investment for your institution's budget.

2. Ultra-Efficient & Sustainable Design

Experience significant energy savings with our low-power, silent fanless systems that operate efficiently while maintaining a quiet learning environment.

3. Complete Customization Flexibility

Tailor every aspect to your needs from storage size and custom applications to personalized labeling options for your specific project requirements.

4. Versatile Operating System Support

Run multiple operating systems on a single system, providing the flexibility to support diverse educational programs and technical curricula.

5. Ready-to-Deploy Solutions

Standard systems come equipped with display connectivity for console access, ensuring straightforward setup and convenient management right out of the box.

Join forward-thinking educational institutions across Canada who are already saving costs, reducing energy consumption, and delivering exceptional learning experiences with BoingfireEDU-CA.

Students can also benefit from special pricing under BoingfireEDU-CA, making advanced technology accessible for personal projects, research, and learning.

and more......

BoingfireEDU CA

Configure It Your Way

Boingfire systems can be tailored to your campus standards and project needs. Choose RAM and storage configurations for labs, add Wi-Fi plus LTE/4G or 5G for portable or remote sites, and select 1GbE or 2.5GbE networking to match your infrastructure. Systems can also be delivered as branded, institute-ready builds to standardize rollouts across classrooms, research teams, and satellite locations.
